# 6DIAS TÊXTEIS INTERNACIONAIS

## 6L37

**Products:** 6DIAS is a weaving and fabric trading company, extremely motivated and focused on customer satisfaction. We present a variety of fabrics in different compositions, in 100% or in a mixture of fibers, which can be dyed and/or finished according to the client's need.

Our Basic FABRICS: Cotton, Polyester, Viscose, tencel, ecovero, Silk, Linen, Denim, organic and recycled fibers, etc.

OUR STRUCTURES: tafetta, twill, crepe, poplin, voile, chambray, chiffon, mousslin, etc.

The constant following of trends, markets and innovation allows us to produce and trade differentiating products, such as printings, weaving, jacquard, embroidery, laces, pleats, quilts, etc.

**Products End-Uses:** Apparel / Clothing / Uniforms.

**Contact:** geral@6dias.pt

- BCI

### **Products:** Circular Knitted Fabrics.

Market leader in the manufacture of circular knitting since 1947 with a strong position in several fields of activity, which we identify in our three collection segments:

- **Ready To Wear** — Creative and sophisticated fabrics, with the noblest raw materials and finishes.
- **Pure Life** — Organic, biodegradable and recycled materials combined into fabrics with an environmental conscience.
- **Sport Active** — State-of-the-art fibres and finishes in engineered constructions for high performance fabrics.
- **PROTECTION+** — Protection+ by A. Sampaio offers fabrics for workwear and PPE compliant with various standards.

**End-Uses:** Activewear; Sportswear; Underwear; High quality fashion for men, women and children; Protective and workwear fabrics.

# ACATEL

## FABRICS\_PRINTS\_5F54

**Products:** Printed woven fabrics and knitted fabrics

Our GOAL: ACATEL, for several years, has changed the more traditional production techniques and transformed them into techniques and processes that could be more “responsible” and “environmentally friendly”.

This paradigm shift began with changes in production processes complemented with new (more efficient) equipment and based on quality and environmental certifications.

This first phase intended to reduce the company's carbon footprint, supported by reduction in energy consumption, water consumption and a reduction in the supply of CO2.

**End-Uses:** Citywear, Casualwear, Streetwear, High Street fashion, Scarves, Lingerie and Swimwear.

# CASA DA MALHA

## FABRICS\_KNITS\_5M78

**Products:** Our company was born from the desire to be an innovative company through socially conscious and sustainable actions. Although we can be considered as a recent company, we have a history of over 50 years in the textile industry.

We produce a wide range of circular knits, from a basic jersey to an elaborated fantasy double-face, while trying to ensure our products quality through constant supervision and the use of premium and renewable raw materials among which we highlight: merino wool, regenerative cotton, extra-long staple cotton, PLA, manmade cellulosic fibers (such as ECOVERO viscose, TENCEL, refibra, circulo), hemp and bio-based elastane.

We also do everything we can so that our resources don't go to waist and are still developing circular practices to help reduce the ecological footprint and shorten our value chain. The main impact topics such as eco and circular design, life cycle assessment and traceability are present in our collection development and are urgent topics in Casa da Malha's activity. In terms of finishing processes we highlight the use of lower impact dyes such as Colorifix, vegetable and other natural pigments, and we also kept the natural colors of some knits avoiding that step/process.

Performance: Termo-regulator; Anti-bacterial; Water-repellent; Stain-resistance; Wind-proof; Breathable; Bi-stretch; Anti-Odor.

**End-Uses:** Menswear; Womenswear; Childrenswear; Active sport; Casualwear; Citywear; Loungewear; High end; Fashionwear.

We are here to innovate and deliver solutions for our partners to empower their success. We strive to minimize the environmental footprint of our operations and want to impact the planet positively. For Spring Summer 25, TMG Textiles presents EFÉMERO, which intends to evoke the memories of the perfect summer moment. Amid all the troubles, all the concerns, and all the geopolitical tensions around the world, we invite our customers to remember that brief summer moment, warm weather, and a cooling breeze. Maybe you were at the beach, a lake, or a mountain meadow. Or maybe you were exploring an exciting new city, an exotic new country, or having the adventure of a lifetime. There was not a worry, there was not a problem, there was only that perfect summer moment that we kept for later, crystalized in time. What's the summer memento you kept for later?

# WONDER RAW

## SMART TECH\_6HUB60

**Products:** WonderRaw was born to make it possible for anyone to create their own casual clothing brand with the lowest investment and in an easy and intuitive way. Starting with a ready-for-dyeing in-stock set of five different styles – T-Shirts, Sweatshirts, Hoodies, Pants, and Shorts – we allow full customization of colors, prints, embroideries, labeling, accessories, and packaging. Additionally, we can provide our customers with warehousing and dropshipping services for the collections developed with us. We specialize in Direct-To-Garment digital printing and will be presenting a garment collection that showcases:

- Different types of garment dyeing techniques, finishes, and washings;
- Printed artworks using an innovative digital printing process that allows dye sublimation, 3D, vinyl, and embroidery effects, utilizing eco-friendly, non-toxic, water-based, and GOTS certified inks;
- The five styles that we make available for customization, produced in 100% organic cotton and featuring the colors that will be trending in the SS25 season.
- The colors of blanks that will be available on our upcoming e-commerce platform.

**End-Uses:** Genderless Casualwear.

## MANUFACTURING \_6R82

### **Products:**

SPORTWEAR Sweatshirts/Sweatpants/Dress/Skirts/T-Shirts/Zip Hoodies, all in knitted. We develop for our clients their collections (they send to us the process with a drawing, and we developed the first proto sample until the final collection). We propose to our customers new developments of fabrics, accessories, dying process and sewing. Our research and development department together with our commercial department are an extension of our clients' design teams. The result can be a simple fabric development, a printing or embroidering technique, or a piece of clothing that will work as a starting point for something else or a final ready to market product. In such a globally competitive sector we are always watchful for change and innovation. We strive to excel with great quality in the materials and finishes innovation. We commit to our clients to always achieve good results and/or find the best solutions for a perfect final product. The goal is to create individual solutions that answer our clients' needs.

# CARMAFIL

## MANUFACTURING\_6T77

**Products:** At Carmafil, we believe that the quality of our services and value-added products is strongly influenced by our choices. We encourage personal development, self-expression and promote fairness.

Preservation of the environment is fundamental. Therefore, Carmafil has been implementing an environmental policy in its facilities in order to reduce its impact on the environment. Some of our actions include the installation of a tank to reuse the washing water, the installation of 180 solar panels and the recycling of waste water.

Sustainability Showcase

**5C25**

iTechStyle Green Circle® is an initiative created to inspire professionals and stakeholders of the Textile and Fashion Industry to the adoption of sustainable practices in materials choice and its transformation. This initiative is permanently monitoring Portuguese development and production of sustainable textile materials and convokes Portuguese designers to create outfits based on these materials under the principles of eco-design. As a result of the initiative, iTechStyle Green Circle® presents developments for different market segments such as Fashion, Athleisure and Home Textiles.

With the purpose of promoting the skills of the sector and the added value of "Made in Portugal", the iTechStyle GreenCircle initiative brought together, more than 50 Portuguese companies from the most diverse segments (spinning, dyeing, finishing, printing, manufacturing, accessories, embroidery), and selected more than 120 different materials, which reflects the versatility and productive and creative capacity of the Portuguese textile sector.

iTechStyleGreen Circle® is an initiative of CITEVE - Portuguese Technological Centre for Textiles and Clothing Industries, with the support of ASM - Associação Selectiva Moda, creatively curated by Paulo Gomes.
